

## Day-1

---

### 1. Select your niche

- Download the [1K Profitable Niches](#). Read the list to get familiar with the available options.
- From the list, select 5 niches that are familiar to you.
- And from the 5 familiar niches, select the one niche that you like best. That should be your niche.

### 2. Register your domain name and setup your blog hosting

- Download the domain search template: [1K Domain Ideas](#).
- Open the template, you will notice that the placeholder keywords are "Home" and "Cleaning".
- Replace the placeholders with two words from your niche keywords. You will obtain a list of domain ideas.
- From that list, pick 5 domain ideas that you like.
- Go to [domain search page on ipage.com](#) and search if any of the selected domains is available. Search one by one so that you can get a new list of suggested domain ideas generated on the search page.
- If none of them is available, pick other 10 domain ideas from the list, go to [ipage.com domain search page](#) and search again, one by one.

- Once you find a good domain name that is available, write it down, take [this 75% discounted WordPress hosting deal at iPage.com](#), to setup your hosting and to register your domain for free.
  - [On the page](#), from the top menu, click on **Hosting** and select **WordPress Hosting**.
  - Select the **WP Starter** package and click on **Add to Cart**.
  - On the next page, enter your domain name in the search field, and click on **Search**; you will get a notification that says "**Congrats, your domain is available!**" You will get the **Free SSL Certificate**. Click on **Continue to Add-Ons**.
  - From **Your Cart**, remove all other recommended add-ons products like **Website Backup & Restore**, and **Sitelock**. Click on **Continue to Billing**. On the **Billing & Payment Information** page, enter your details and click on **Buy Now**. Once you complete the purchase, you will get by email the confirmation, the invoice, and simple instructions to follow.

### 3. Get your logo designed

- Design your logo. If you are not an experienced designer, get your logo designed by [this freelancer](#).
- Tell the logo designer to create a **favicon** from your logo. You will need it later.
