

Day-4

1. Hire an expert freelancer to complete all the following tasks for Day-4

Write and publish the content for the essential pages. If you've never done this before, or if you things to be done quickly, [go here and hire an expert freelancer](#) to complete all the tasks for Day-4.

2. Write and publish a "Home" page

- Make sure that it features the list of your recently published blog posts, with posts' titles, snippets, and prominent links to the full articles.
- Add the "Home" page to the main menu as the first menu item.

3. Write and publish an "About" page

- Make sure that tells your story and give people reasons to read your blog and subscribe to your newsletter.
- Add the "About" page to the footer menu, and publish the content.

4. Write and publish a "Contact" page

- On the page, share your email address and other social media profiles.
- Add the "Contact" page to the header menu, and publish the content.

- Take the contact form code that the [Fluent Forms plugin](#) had generated on Day-2 and add it to the page.
- Test the form to make sure that it works.

- 5. Write and publish a "Newsletter" page**
 - Ensure that the copy tells people why they should join your newsletter.
 - Add the "Newsletter" page to the header menu, and publish the content.
 - Copy the signup form code that you got from [GetResponse](#) on Day-3 and paste it into the page.
 - Test the opt-in form and see if you actually receive the new subscriber to your email list.

- 6. Write and publish a "Privacy Policy" page**
 - Hire an [expert freelancer](#) to select the right template and customize it for you.
 - add the "Privacy Policy" page the footer menu, and publish the content.

- 7. Write and publish a "Terms of Service" page**
 - Get an [expert freelancer](#) to craft one for you based on a template.
 - Add the "Terms of Service" page to the footer menu, and publish the content.

8. Test all links and buttons

- Click on every link in all the content of the pages to make sure that every link works correctly.
- Fix all broken links and 404 errors, if any.
